Product Introduction

Tgo is a compact touch controller, integrated with 8 inch LCD touch screen on which users can operate RGBlink video processors. A dedicated HDMI 2.0 output port is built in to connect a UHD display as an extended operation interface. Standard with desktop accessory, Tgo can stand alone on desktop and control video processor without PC. It is also coming with a fitted ABS flight case which make it portable and safe.

Tgo standard with desktop

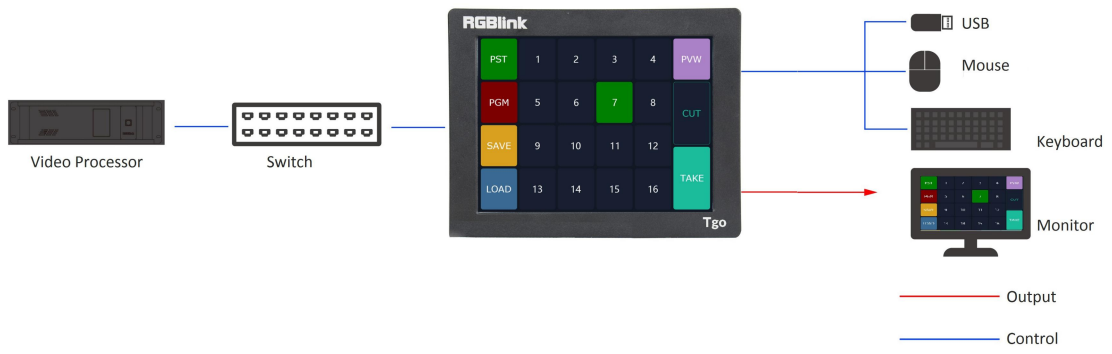

Tgo with rack mount option

System Connection

RGBlink offers solutions to demanding technical problems. Any application questions, or required further information, please contact with our customer Support Engineers.

Install Accessory

Desktop

- Lock ② swivel seat to ① Tgo with ③ M3*5 socket cap screw.
- Lock ⑦ support base to ② swivel seat with ④ M4*12 plum hand screw, ⑤ shim and ⑥ T type nylon gasket

Wall

- Lock ② swivel seat to ① Tgo with ③ M3*5 socket cap screw.
- Lock ⑦ support base to ② swivel seat with ④ M4*12 plum hand screw, ⑤ shim and ⑥ T type nylon gasket
- Fix ⑦ support base with screw or nail through ⑧ strip groove.

Rack

- Lock ② swivel seat to ① Tgo with ③ M3*5 socket cap screw.
- Lock ⑦ hanger to ② swivel seat with ④ M4*12 plum hand screw, ⑤ shim and ⑥ T type nylon gasket

Use Your Product

Physical Connection

1. Connect Tgo with video processor with ethernet cable or connect both Tgo and video processor to the router of the same network.
2. Use HDMI cable to connect the monitor and Tgo.
3. Plug the power adapter to power socket and Plug the DC connector to Tgo.

Device Connection

1. After Tgo is power on, it will enter the Device Connect interface on the touch screen shown as below:

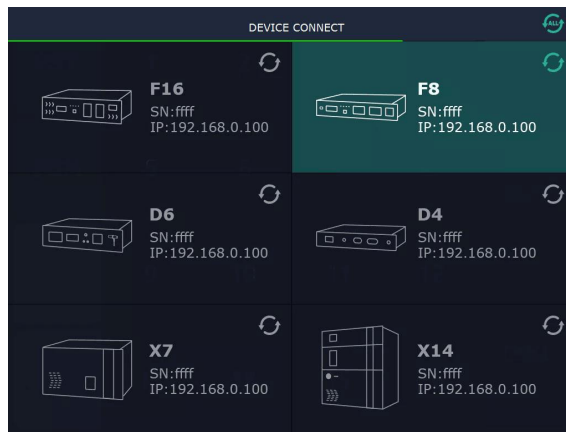

Click icon  ALL on the top right to refresh the list of available devices to connect.

On the monitor screen, users can see the Topology Diagram section on XPOSE 2.0 interface.

Connect mouse to the USB 3.0 or USB 2.0 on the right side of Tgo, users can click the icons and buttons on both Tgo and monitor screen.

2. Click icon  on the top right corner and device can be connected.

Device Control

After device is connected, Tgo enter the following interface:

On Tgo interface, there are PST, PGM, SAVE, LOAD and PVW features available.

Each feature is indicated in respective color. Except PVW, the numbers light up with correspondent color indicate the Display Area or Bank available to CUT or TAKE to output display.

For example, current PST got only 1 Display Area, the number 1 lit in green under PST. If this Display Area need to be switched to PGM, press CUT or TAKE.

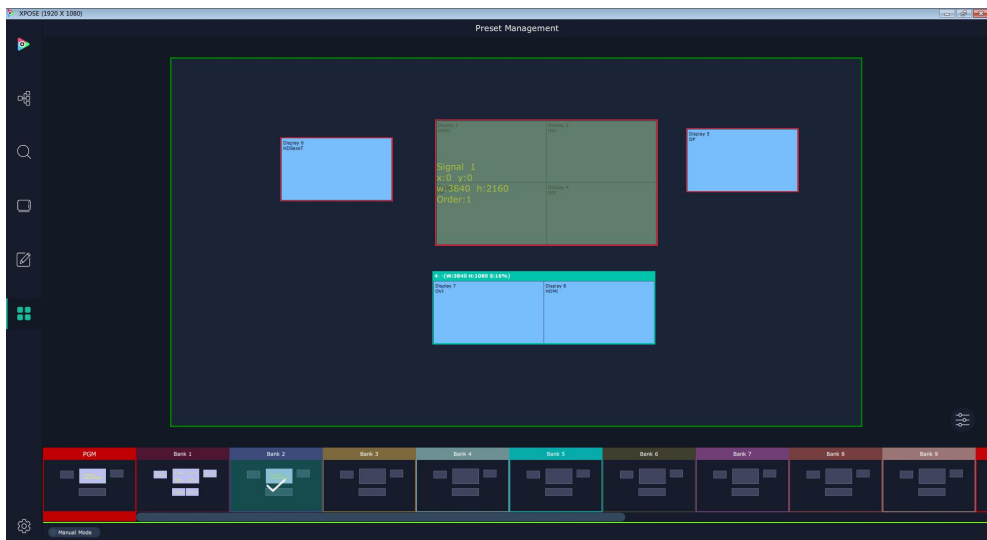

If there are 3 Display Areas on PGM, number 1.2.3 lit in red, touching the lit number can keep the the content on correspondent Display Area.

Number lit in blue indicating the currently selected Bank index.

For example, number 2 lit in blue, indicate that Bank 2 is selected

PST, PGM, LOAD operation on Tgo can be found on Preset Management of XPOSE 2.0 shown on monitor.

Touching **PVW** button, users can preview the input source, PST and PGM on Tgo.

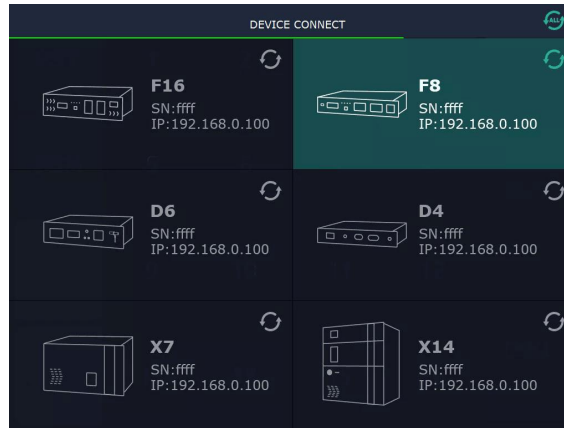

Click this icon, 7 different PVW (PST:Green, PGM:Red, Input Souce:Purple) layout is offered.

Keep pressing this icon, Tgo can be powered off.

click this ion, Tgo will go back to Device Connect interface.

XPOSE 2.0 on monitor go back to search device.
