

X1 Gen2

Broadcast-grade LED Video Processor

After 7 years, X1 iteration happens and Gen2 is released, refine and enhance based on market feedback and trends.

As a leading broadcast video processor, X1 solids its DVI output resolution up to 2048×1152@60 and customized resolution capacity. And it offers an optional SDI module to meet studio and rental requirement, also extends its broadcast ability to multiple test pattern build in, seamless switching between inputs, auto detection for VESA and SMPTE input standard, audio embedded and de-embedder.

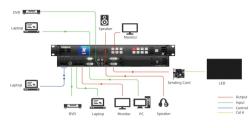

X1 is dedicated for LED display processor and compatible with common LED control system, including Novastar, Colorlight, Linsn, Mooncell and RGBlink.

Key Features

- Picture-in-Picture (PIP), Picture-by-Picture (PBP), and customized PIP layout
- Audio and video synchronization
- Support multiple signal format inputs
- Seamless TAKE switching between inputs
- DSK/Chroma Key
- open API for 3rd party integration

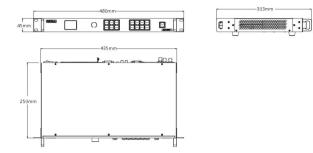

Application

- Standard build in with 2 DVI outputs
- Customized output resolution
- Multiple units can be cascaded for uniform control
- On board test patterns
