

Q16pro Gen2 1U

Quick Start

- Modular design with flexible input & output combinations
- Dual OSD rolling subtitles for 2K output module
- De-interlacing function
- Support 8 screens spanning the output port without occupying layers
- 4K@60 input & output
- Custom EDID & output resolutions
- Control via XPOSE and RGBlink OpenAPI
- Connect to the webcam for decoding

Product Introduction

Q16pro Gen2 1U adopts **modular design**, which supports up to **8 inputs**, including quad HDMI 2.0, dual HDMI 2.0 & DP 1.2, quad DVI, quad SD/HD/3G SDI, single H.264/265 for 2K and 4K signals; **4 outputs**, with dual HDMI 2.0, dual DP 1.2, quad HDMI 1.3, quad DVI, quad SDI signals optional.

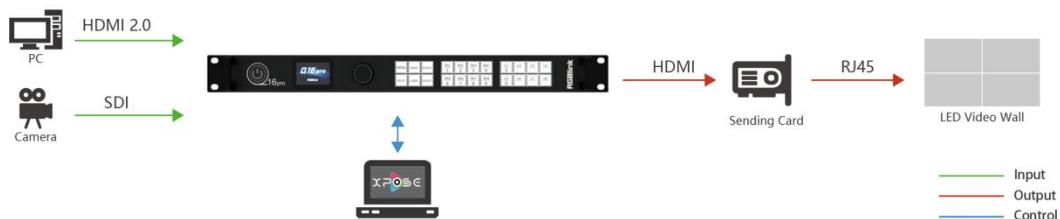

The **standard unit** comes with 4 HDMI 1.3 outputs and builds with local front control panel and remote control interfaces with RS 232 and Ethernet ports.

Q16pro Gen2 1U is available to be **remote controlled** by XPOSE or 3rd party APP / controller by open API. Q16pro Gen2 1U combines rugged design, class-leading video processing and image quality, ultra-low latency, versatile 4K connectivity, livestreaming capabilities, and unmatched ease of use to meet the requirement of the modern commercial display systems application, including live corporate meetings, hybrid events, worship productions, or large-scale LED video wall installations.

Its 8 layers with **roaming capacity** and **layer can cross over each output without layer counting up**.

					Factory Reset

Use Your Product

Presentation

After the device is boot up, push MENU to enter main menu interface. Then rotate the knob and select <Presentation>.

```
Output Resolutions  >>
Image Layout       >>
```

Output Resolution

Output Resolution: Choose Standard or Custom resolution.

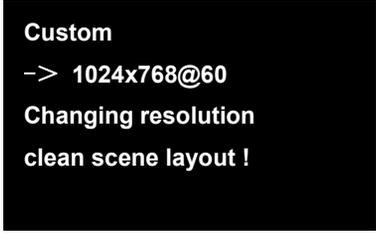

```
Standard  >>
Custom    >>
```

Standard: Rotate the knob to choose standard resolution.

```
Standard
-> 1920x1080@60
Changing resolution
clean scene layout !
```

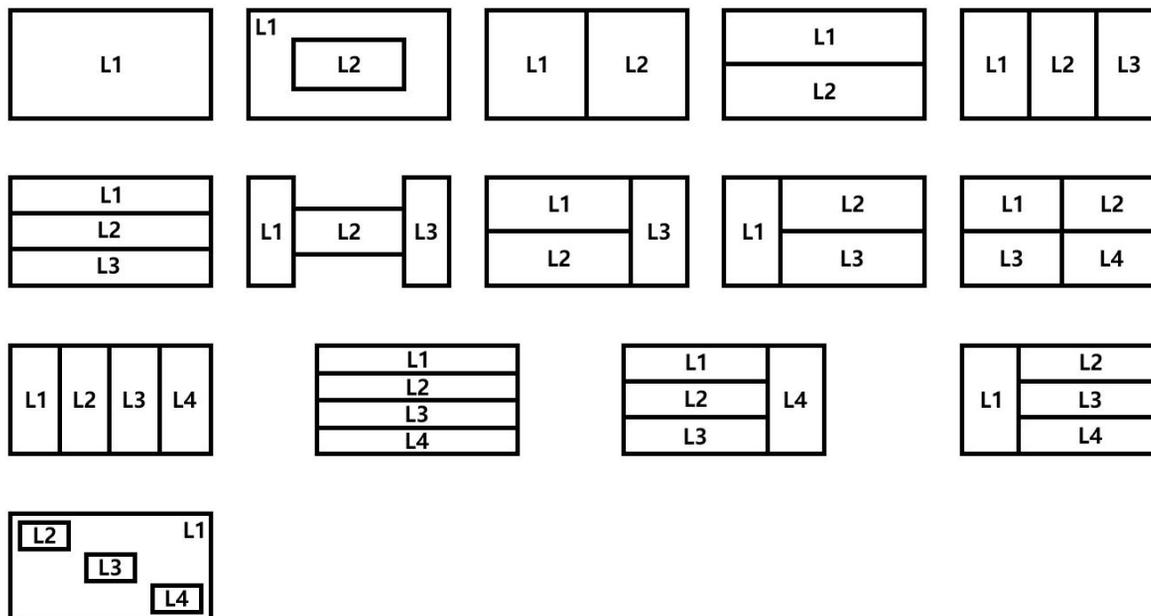

Custom: Use 0~9 numbers to key in the width, height and frame rate.

```
Custom
-> 1024x768@60
Changing resolution
clean scene layout !
```

Image Layout

Select the image layout for presentation mode. There are 15 layout patterns built-in as follows:

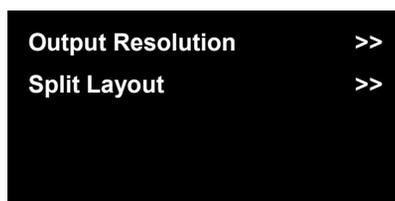

Push the knob to select layout, and the LCD Panel will automatically return to the previous menu interface.

Users can use the L1-L8 buttons on the front panel to select the layer, and then select the input signal by using IN1- IN8 buttons.

Note: ONLY the first four layouts are available for 4K input module. Please reselect if the wrong layout is chosen.

Split

After the device is boot up, push MENU to enter main menu interface. Then rotate the knob and select <Split>.

Output Resolution

The same operation as shown in Presentation.

Split Layout

There are 6 split modes available.

Split Mode	Background	Multi-Picture Layout
H 1/2		
V 1/2		
Cross		
H 1/4		
V 1/4		
H 1/3		

Choose the split mode from 6 types shown above by rotating the knob. Push the knob to select the

multi-picture layout under this split mode and then set parameters.
The LCD screen displays as follows:

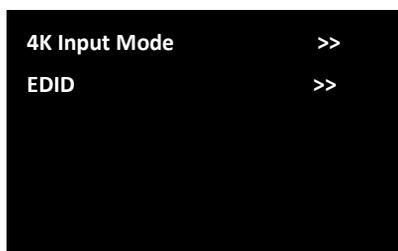

Set H total, V total, width1 of screen according to actual need.

Note: ONLY **H 1/2 layout** and **V 1/2 layout** are available for 4K input module. Please reselect if the wrong layout is chosen.

Advanced

After the device is boot up, push MENU to enter main menu interface. Then rotate the knob and select <Advanced>.

4K Input Mode

Source 1/2: with HDMI 2.0, DP 1.2 input source available

Rotate the knob to "Save" and push the knob to save above settings.

EDID

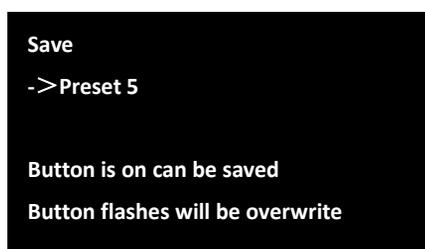

Input port: 1~8 Input Port

Source: Choose CUSTOM to custom EDID, Choose RESET to reset EDID

Save Preset

After the device is boot up, push MENU to enter main menu interface. Then rotate the knob and select <Save>.

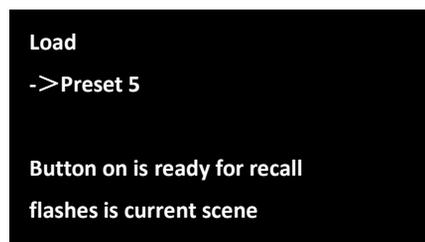

Digital buttons 0-9 will be always on or flashing. **An always-on button** indicates that no preset has not been saved at this position; **A flashing button** indicates that certain preset has been saved at this position already.

Users can turn the rotary knob to select Preset1-Preset16 or use the number button 1, 2, 3, 4, 5, 6, 7, 8, 9, 0 to select Preset1-Preset10. Select the position that will save, push the knob to confirm.

Saving preset in the button with flashing light will **overwrite** the saved parameters before.

Load Preset

After the device is boot up, push MENU to enter main menu interface. Then rotate the knob and select <Load>.

Digital buttons 0-9 will be always on or flashing. **An always-on button** indicates that certain preset has been saved at this position; **A flashing button** indicates that certain preset has been saved at this position already, which is ready for recall.

System

After the device is boot up, push MENU to enter main menu interface. Then rotate the knob and select <System>.

SN	1024
